

## Logarithmic Price Scale now available

---

When working with historical charts (daily or weekly), you can now display logarithmic price scaling.

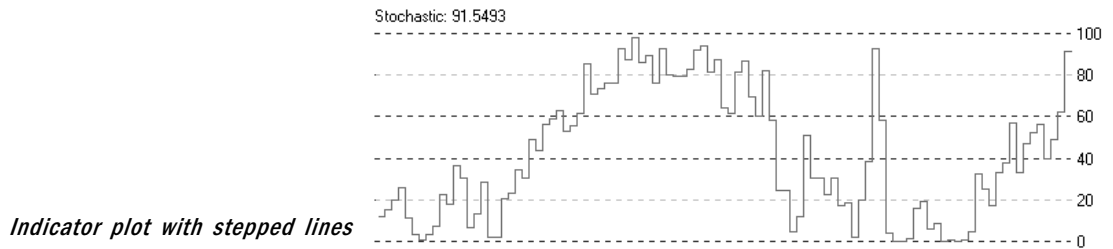

â To display logarithmic price scaling:

1. Open the **Properties** dialog box by right clicking on the chart and selecting **Properties** from the pop-up menu. Or, select **Chart Properties** from the **File** menu.
2. In the **Options** section of this box, check the box labeled **Logarithmic Scale**.

Choose indicator graph type (stepped or smooth)

---

Indicator plots on charts can now be displayed with stepped lines.

â To change indicator plots from smooth to stepped lines:

1. Open the **Properties** dialog box by right clicking on the chart and selecting **Properties** from the pop-up menu. Or, select **Chart Properties** from the **File** menu.
2. In the **Options** section of this box, check the box labeled **Stepped Lines**.
