## 3. Import a CSV File from Excel

Fundamental data from an Excel spreadsheet can be imported into the *Fundamentals* application. The Excel work sheet containing the data must first be saved to the CSV (comma delimited) format.

- *To import a CSV file, follow these steps:*
- Open *Fundamentals for TradingExpert Pro*, from the menu bar select **Fundamentals**, and from the drop-down menu select **Import CSV File...** A dialog box titled *Import Fundamentals from CSV File* will appear.
- 2. Use the *Look in* list box, the *Up One Level* command button, and the icons in the main window to find and select the CSV file you wish to import.
- 3. With the CSV file selected in the main window and its name displayed in the *File name* box, click **Open**.

4. The screen that appears next lists the field names obtained from the first line of the file. If these names are acceptable, click **Yes**. If you do not want to accept the names, click **No** to abort the import and use Excel or a word processing program to make revisions.

5. The next screen asks you to select the column containing the ticker name. Select the correct field from the list box and click **OK**.
