# Overview

---

## Chapter I. Technical Indicators Explained

This chapter provides explanations of the technical indicators that are available for charting in TradingExpert Pro's Technical Indicator Library. Included are Price Plot indicators, indicators that are displayed separately below the Price Plot, and Candlestick and Point and Figure charting.

## Chapter II. Indicator Barometer

The Indicator Barometer on the Control Panel of the AIQ charts provides a "snapshot" view of the status of the indicators at any particular point in time. This chapter contains an explanation of the rules that determine the color and configuration of the colored squares on the Barometer.

## Chapter III. Confirmation of Expert Rating Signals Using Technical Indicators

AIQ recommends confirmation of Expert Rating signals. To guide you, this chapter provides a Signal Confirmation Guide.

## Appendixes

Should you require more detailed information about any technical indicator, a list of references and the mathematical formulae for the indicators can be found in Appendixes.
